Updated Other Contaminant

Notes:

Release from an on-location valve/piping leak flowed off the location into a cultivated field according to the report. Followup is necessary to confirm adequate cleanup and restoration of the off-site impacts.

Date: 7/17/2014 **Status:** Inspection

Author: Washek, Sandi

Updated Oil Volume: 3.00 gallons

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on site at 11:59am. The weather was sunny; hot wind out of the SW at 5 mph. The site had already been cleaned up on arrival. Company rep informed me that the landowner was ok with the cleanup. The site was about 30 ft x 10 ft in size. The soil had been removed and sent to PDI in Tioga. New clean topsoil was brought in and leveled out. There was no impact to water. No additional followup needed.
